

Department Proposal — A Calm Second Brain for Teachers

A 1-page summary for heads of department, SLT, and budget holders.

The problem

Teachers in our department are spending 8–12 hours per week on lesson planning, differentiation, marking, and parent reports. The result: late nights, slower feedback loops for pupils, and rising attrition risk.

What AIME does

- Plans lessons aligned to UK National Curriculum, Common Core, and IB frameworks.
- Cross-references your specific exam boards (AQA, Edexcel, OCR, WJEC, CIE) to prevent hallucinated content.
- Drafts differentiated tasks for SEN, EAL, and extension learners — in one click.
- Generates parent reports and formative feedback in the teacher's own voice.
- Keeps memory of class context across the term so support compounds, not resets.

Expected ROI

~6 hours saved per teacher per week based on pilot averages.

For a 10-teacher department, that is **240+ hours per month** redirected to teaching, feedback, and pastoral work.

Reduces reliance on supply cover by improving lesson continuity.

Safeguarding & data

GDPR-compliant. UK / EU data residency available.

No pupil data is used to train models.

SSO and role-based access for departments.

Full audit log of AI-generated content.

Pricing for departments

Plan	Per teacher / month	Includes
Departmental (5–20 seats)	£12	All features, shared resource library, SSO
School-wide (20+ seats)	£9	Everything above + dedicated onboarding, CPD session
Pilot (4 weeks)	Free	Full feature access for evaluation, no card required

The ask

Approve a **4-week, free department pilot** covering up to 10 teachers. We will provide setup, a 30-minute kickoff, and a written impact summary at week 4 — no commitment required afterwards.
